

3642/3742

CLOSE-COUPLED AND FRAME-MOUNTED CENTRIFUGAL PUMPS

Commercial Water

FEATURES

Compact Design: Close coupled, space saving design provides easy installation. Flexible couplings and bedplates not required.

Mounting: Can be mounted in vertical or horizontal position.

Construction: Available in bronze fitted (BF), all iron (AI), or all bronze (AB). Bronze fitted means bronze impeller.

Impeller: Enclosed design for high efficiencies. Threaded directly on motor shaft. Stainless steel locknut on three phase models requires no clearance adjustments. Balanced for smooth operation.

Casing: Volute type, cast iron or brass construction. Back pullout design. Discharge can be rotated in eight positions. Vertical discharge standard. Tapped openings provided for priming, venting and draining.

Mechanical Seal: Standard carbon/ ceramic faces, BUNA elastomers, 300 series stainless steel components. Option seals available.

Motor: Close-coupled design. Ball bearings carry all radial/axial thrust loads. Designed for continuous operation. All ratings are within working limits of the motor.

Frame-Mounted Design: Offers flexibility of installation and driver arrangements. Cast Iron Power Frame rigidly supports the grease-for-life ball bearing shaft assembly.

OPTIONAL MECHANICAL SEALS

| | | Materials | • | | Part No. | Seal Type | Service | | |
|--------|--------|--------------|-----------------------------|-------------|----------|-----------|--------------------------|--|--|
| Suffix | Rotary | Stationary | Elastomer | Metal Parts | rait NO. | Sear Type | Service | | |
| Blank | | Ceramic | Ceramic BUNA 316 SS 10K10 6 | | General | | | | |
| N | Carbon | Ni-Resistant | DOINA | 18-8 SS | 10K6 | | Fluct. Temp. up to 212°F | | |
| 0 | Carbon | Sil-Carbide | EPR | 316 SS | 10K18 | 21 | Hot Water up to 250°F | | |
| V | | 311-Carbide | Viton | 31033 | 10K55 | | Mild Chemical | | |

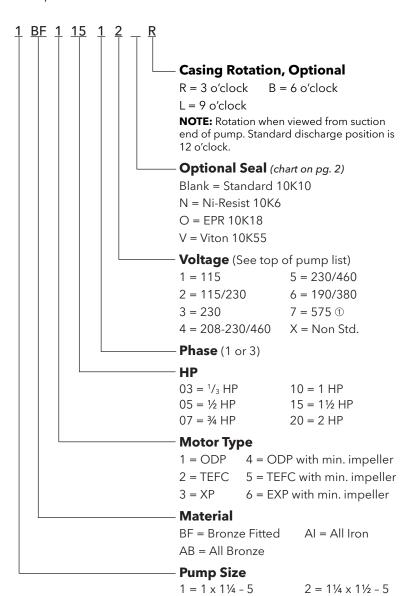

NOTE: To order an Optional Mechanical Seal, add appropriate suffix to order number. "N" for 10K6; "O" for 10K18 and "V" for 10K55. 10K55 replaces 10K24. The 10K55 has a 150 PSI rating, note that the pump's maximum working pressure is only 125 PSI.

3642/3742 NUMBERING SYSTEM

The various versions of the 3642 and 3742 are identified by a product code number on the pump label. This nuber is also the catalog number for the pump. The meaning of each digit in the product code number is shown below.

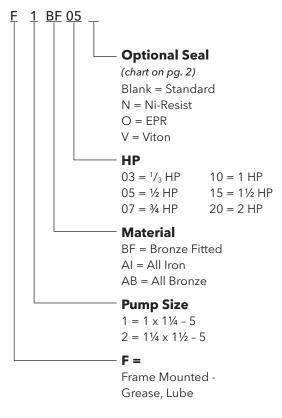

3500 RPM CLOSE COUPLED

Example Product Code 1BF11512

FRAME MOUNTED PUMPS ONLY

Example Product Code F1BF05

① 575 Volt motors have an extended lead time.

NOTE: Not recommended for operation beyond printed H-Q curve. For critical application conditions consult factory.

NOTE: Not all combinations of motor, impeller and seal options are available for every pump model. Contact Customer Service for information on non-cataloged order numbers.

NOTE: Impellers will be trimmed in 1/16" increments only. If you are ordering a trim within 1/16" of the standard impeller, you will receive the standard impeller trim.

NOTES:

- 1. Pumps will be shipped with top vertical discharge as standard. For other orientations, remove casing bolts, rotate to desired position, replace and tighten % 16 bolts to 37 lb./ft.
- 2. Not to be used for construction purposes.
- 3. Dimensions in inches

Goulds Water Technology

Commercial Water

APPLICATIONS

Specifically designed for the following uses:

- Water circulation
- Booster service
- Liquid transfer
- Spraying systems
- Jockey pump service
- General purpose pumping

SPECIFICATIONS

Pump

• Capacities: to 110 GPM

• Heads: to 118 feet

• Pipe connections:

| | Model | Suction | Discharge | | | | |
|---|-------------|---------|-----------|--|--|--|--|
| Ì | 1 x 1¼ - 5 | 1¼" NPT | 1" NPT | | | | |
| ĺ | 1¼ x 1½ - 5 | 1½" NPT | 11/4" NPT | | | | |

- Maximum working pressure: 125 PSI
- Temperature: standard seal, 212° F (100° C) maximum or 250° F (121° C) with optional high temperature seal.
- Rotation: right hand i.e.; clockwise when viewed from motor end.

Motor

- NEMA standard
- Open drip proof, TEFC, or (explosion proof three phase only) enclosures.
- 60 Hz, 3500 RPM
- Stainless steel shaft
- Single phase: ½-2 HP ODP or TEFC. Built-in overload with automatic reset.
- Three phase: ½ 2 HP: ODP, 208-230/460 V
 ½ 2 HP: TEFC, 208-230/460 V
 ½ 2 HP: expl. proof, 230/460 V
- NEMA 56J frame motors are used on close-coupled 3642 pumps and T-frame motors are used on frame-mounted 3742 pumps.
- Overload protection must be provided in starter unit. Starter and heaters (3) must be ordered separately.

Goulds Water Technology

Commercial Water

Xylem |'zīləm|

- 1) The tissue in plants that brings water upward from the roots;
- 2) a leading global water technology company.

We're a global team unified in a common purpose: creating innovative solutions to meet our world's water needs. Developing new technologies that will improve the way water is used, conserved, and re-used in the future is central to our work. We move, treat, analyze, and return water to the environment, and we help people use water efficiently, in their homes, buildings, factories and farms. In more than 150 countries, we have strong, long-standing relationships with customers who know us for our powerful combination of leading product brands and applications expertise, backed by a legacy of innovation.
